Karibu! (Welcome!)

OUR VISION

SASPLAN

To be the leading engineering and construction company in Zanzibar, known for our expertise, professionalism, and commitment to customer satisfaction.

OUR MISSION

MISSION 01

To provide our clients with the highest quality engineering and construction services, on time and within budget

OUR SERVICES

Building Construction (all types)

We have a team of experienced construction professionals who can handle any type of building project, from small residential homes to large commercial and industrial developments. We use the latest technologies and equipment to ensure that our projects are completed on time and within budget.

Building Maintenance

We offer a comprehensive range of building maintenance services, including preventive maintenance, repairs, and renovations. We can help you keep your building in top condition and extend its lifespan.

Architecture Design

We have a team of experienced architects who can design buildings that are both functional and aesthetically pleasing. We work closely with our clients to understand their needs and expectations, and we provide them with a variety of design options to choose from.

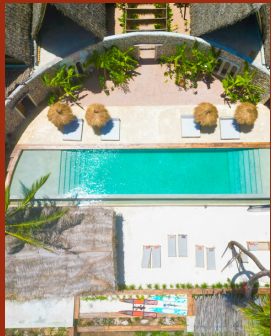

Building Consultancy

We offer a range of building consultancy services, including project management, cost estimation, and value engineering. We can help you manage your project from start to finish, and we can help you save money by identifying and eliminating unnecessary costs.

Structural Design

Our team of experienced structural engineers provides comprehensive design solutions for a wide range of buildings and structures, ensuring stability, safety, and functionality. We utilize advanced design software and adhere to the latest building codes to create efficient and cost-effective structural systems for projects such as: Residential Buildings, Commercial Buildings, Infrastructure Projects, Industrial Buildings, Institutional Buildings

Swimming Pools

We bring your dream pool to life with our custom structural design services for swimming pools of all shapes, sizes, and styles. Our engineers consider factors like water weight, soil conditions, and local building codes to create a structurally sound and aesthetically pleasing pool design. We collaborate with our architectural team to ensure seamless integration of the pool into your overall landscape plan.

Landscaping

We offer a full range of landscaping services, from design, mapping and installation to maintenance.
